To Whom It May Concern:

This letter is to confirm that Rebecca Woodin has successfully completed Moral Reconciliation Therapy, an evidence-based Cognitive Behavioral program offered by Volunteers of America Upstate New York within the Monroe County Jail.

Moral Reconciliation Therapy (MRT) is a 12-16 step program aimed at impacting personality and behavior of individuals currently incarcerated. This program seeks to help participants understand their beliefs and choices that resulted in their current situations with the overall goal of reducing the chances of recidivism. Rebecca completed this program individually while working one-on-one with a master's level clinician.

Primary goals of MRT include:

- Enhance moral reasoning and value based decision making
- Build trusting and honest relationships
- Develop overall acceptance of one's current situation
- Set goals for positive changes and maintain motivation
- Heal damaged relationships
- Develop positive social skills and support
- Give back to others and engage in positive peer interactions

Rebecca enrolled in the program on March 9, 2020 and successfully completed on August 21, 2020. She met all expectations of the program which include regular correspondence with the facilitator, respect for self, respect for others and timely progression through the program.

Sincerely,

A handwritten signature in black ink that reads "Meghan Perschke, LMHC".
